

SAHARA NET · CLOUD COMPUTING · 2026

Enterprise cloud, built in the Kingdom.

First and one of the largest cloud providers in Saudi Arabia and the GCC - Microsoft Azure and Huawei Cloud delivered from data centers inside the Kingdom, matched to every workload and compliance need.

Cloud, without compromise

Sahara Net has delivered cloud services in the Kingdom since 1998 - evolving from domains and web hosting into a full IaaS, PaaS and EXaaS provider trusted by Saudi enterprise and government.

Today our cloud carries the largest customer base in Saudi Arabia, backed by data centers inside the Kingdom, global hyperscale partners, and 24/7 support in Arabic and English.

support from inside Saudi Arabia

Why enterprises choose Sahara Net

Public cloud alone rarely satisfies Saudi data-residency and compliance needs. Sahara Net blends local and global cloud so you get hyperscale tools without leaving the Kingdom.

Local & Global Reach

Cloud delivered from data centers inside and outside the Kingdom.

Security Built In

The Sahara Shield suite protects every workload by default.

Flexible Consumption

IaaS, PaaS and EXaaS - pay for exactly what you use.

Migration & DR Expertise

Hands-on migration, backup and disaster recovery support.

Enterprise Infrastructure

VPS, collocation and dedicated infrastructure on demand.

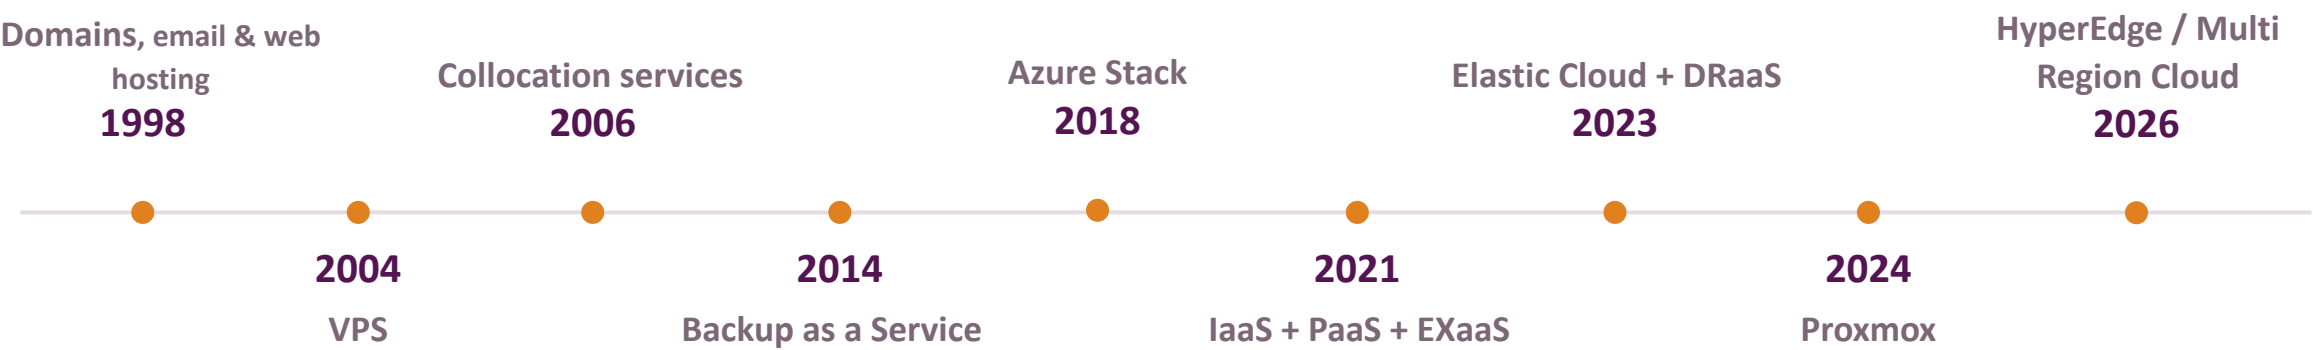

Managed, End to End

From Active Directory to Exchange - we run it with you.

Business growth since 1998

From the Kingdom's first domains and web hosting to a full elastic, multi-cloud platform - nearly three decades of continuous cloud investment.

Kingdom-hosted local cloud option

The Sahara Net cloud offering

LOCAL CLOUD

- Exchange as a Service (EXaaS)
- Cloud Infrastructure as a Service (IaaS)
- Cloud Platform as a Service (PaaS)
- GPU as a Service (GPUaaS)
- AI as a Service (AIaaS)
- Web Hosting
- Azure Stack
- Backup & DR
- Security as a Service
- Email Security

SAHARA SHIELD

- WAF
- WithSecure endpoint protection
- Firewall as a Service (FWaaS)
- Privileged Access Mgmt (PAMaaS)
- Huawei IaaS
- Huawei PaaS

GLOBAL CLOUD

- Microsoft 365
- Microsoft Azure
- Huawei Cloud
- AWS
- Acronis backup & security

Elastic Cloud, built for scale

High-speed memory and the latest processors power every instance. Launch in minutes from an easy-to-use console, scale on real-time demand, and pay only for what you use.

99.9%
Single-instance SLA

99.982%
Multi-zone SLA

One-Click Deploy

Design your solution and launch it with a single click, worldwide.

Horizontal Scaling

Add capacity on demand for high availability - no long-term contracts.

Load Balancers

Distribute traffic automatically to keep applications available.

Elastic Storage

Fault-tolerant, software-defined block, file and object storage.

Live Monitoring

RAM, CPU, network, storage and IO tracked with instant alerts.

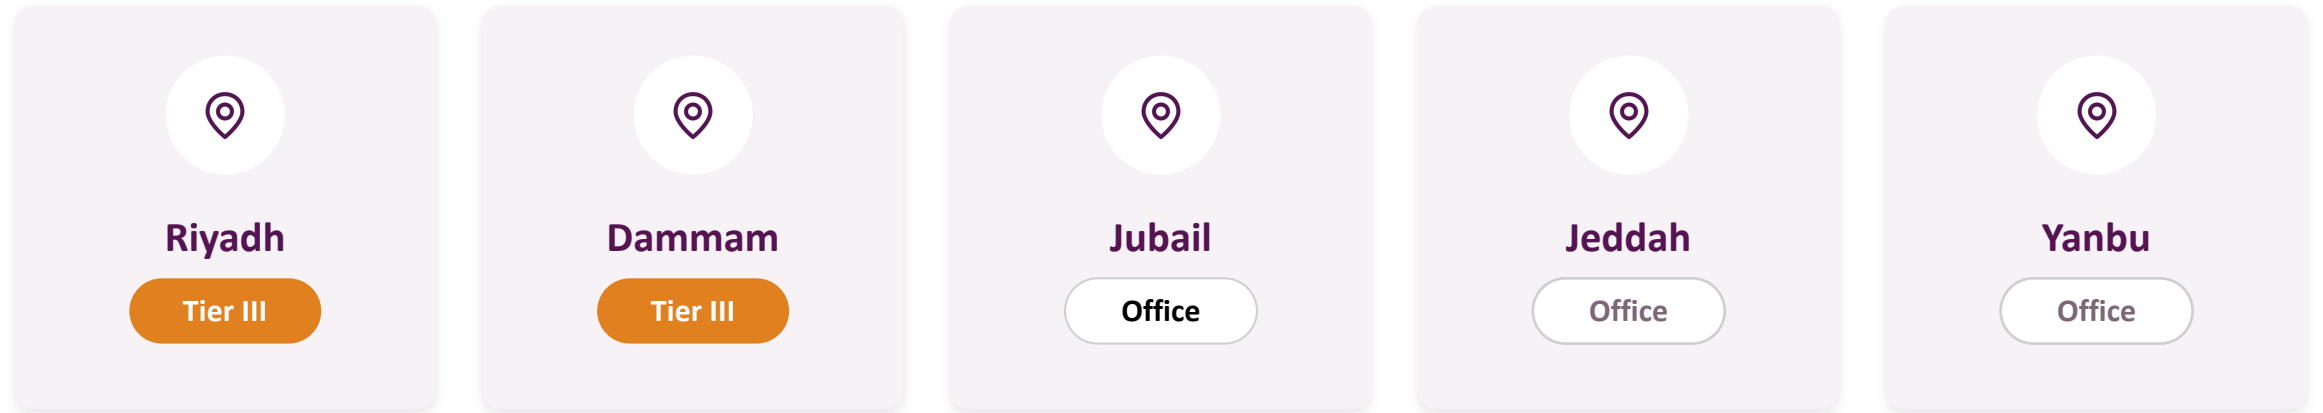

Automatic Backups

Daily backups run by default, with live migration when you need it.

Deploys on CentOS, Debian, Ubuntu, Windows or Docker — with free private VPS-to-VPS networking.

Offices and data centers

Local cloud and collocation from five cities across the Kingdom - so your workloads stay close to your business and inside the Saudi Arabian borders.

Every location connects back to Sahara Net's carrier-neutral backbone, with cross-region backup between facilities for built-in resilience.

Essential plans

Domains

Sahara Net is authorized to register .SA domains and international domains.

Web Hosting

Combined plans for startups and small-to-medium companies covering website and email.

Email Services

Multiple platforms for local and global-hosted business email.

Microsoft

Email and Office applications, licensed and supported by Sahara Net.

ON THE PLATFORM Native Arabic experience · self-service dashboard · Sadad & online payment · 24/7 bilingual support

Backup and disaster recovery

Inter-Region Backup

Backup service running under Sahara Net data centers, region to region.

Global Cloud Backup

Backup services delivered together with a global cloud provider.

Disaster Recovery

DR services inside the Kingdom or on-cloud, to match your RTO/RPO.

Premium partnerships

We pair our own cloud with the industry's leading platforms - certified expertise across compute, backup and security.

Microsoft Azure

AWS

FortiNet

Huawei Cloud

PowerDMARC

Dell Technologies

Hewlett Packard Enterprise

Veeam

Acronis

MICROSOFT GOLD PARTNER · Cloud Solution Provider (CSP) · among the first in the Kingdom to run Azure Stack as a local private cloud

Independently certified, fully licensed

Our cloud and data center operations are independently certified and continuously audited against the Kingdom's leading regulatory frameworks.

- Data Center Tier II Certificate
- Data Center Tier III Certificate
- CST Sahara Datacenter II Certificate
- ISO 9001
- ISO 20000
- ISO 27001
- ISO 27017
- ISO 27018
- PCI-DSS L4 – Merchant

PCI-DSS HOSTING PROVIDER · audited and compliant for card-data hosting environments

Managed services

Professional Services

Sahara Net experts support project success through data migration, Active Directory, Exchange Server and SharePoint implementation and configuration.

Managed Services

We help our valued customers manage their infrastructure, Microsoft services and hosting servers - day to day.

Data Migration

Planned, low-risk migration to your new environment.

Platform Administration

Active Directory, Exchange and SharePoint, kept healthy.

Ongoing Support

A managed relationship, not a one-time project.

Trusted by the Kingdom's leaders
