SAHARA NET · CYBERSECURITY PROFILE · 2026

Always-on defense, operated locally.

End-to-end cybersecurity built on a 24/7 Saudi Security Operations Center, world-leading technology partners, and deep regulatory expertise - protecting the Kingdom's enterprises across the full security lifecycle.

NCA-listed cybersecurity vendor · **ISO 27001 certified** · **24 / 7 / 365 operations** · **sahara.com**

SECURITY AT SAHARA NET

Protecting what powers your business

Sahara Net delivers cybersecurity as a complete, managed discipline - not a product. We bundle the world's leading security technologies with our own 24/7 Security Operations Center and consulting expertise, giving Saudi enterprises a single, accountable partner across protection, detection, response, and compliance.

We safeguard your infrastructure up to Layer 7, eliminate the human-factor risk that breaches most organizations, and keep your operations aligned with NCA, SAMA and Aramco requirements - all from data centers and a SOC inside the Kingdom.

24/7/365

Local SOC monitoring

in Dammam, with DR in Riyadh

6

Security ISO & PCI certifications

ISO 27001 · 27017 · 27018 · 9001 · CSA STAR L2 · PCI DSS

35+

Years securing Saudi enterprises

the Kingdom's pioneering ICT provider

Layer 7

Protection depth

network, application, identity & data

OUR PRACTICE

Four ways we secure you

A single partner across the entire security lifecycle - from proactive defense to incident response, compliance, and hands-on engineering.

01

Managed Security Services

Our SOC monitors, detects, and responds 24/7 — managed SIEM, MDR/EDR, threat intelligence, and the Sahara Shield managed controls.

02

Offensive Security

Red teaming, penetration testing, vulnerability management, incident response, and compromise assessment to find gaps before attackers do.

03

Governance, Risk & Compliance

Aligning you to NCA ECC, SAMA CSF, Aramco CCC and more — through assessment, documentation, awareness, and advisory.

04

Professional Services

Design, deployment, and tuning of best-in-class security platforms from our certified engineering team and global partners.

SECURITY OPERATIONS CENTER

Defense that never sleeps - operated locally

24/7/365

Continuous monitoring, threat detection, and response from our SOC in Dammam - with full disaster recovery and business continuity in Riyadh.

Local
Saudi-national analyst team

CST
licensed operator

NCA
listed cybersecurity vendor

- Operated around the clock by a highly certified local team
- Certified ISO 27001 & ISO 9001; cloud-certified ISO 27017, ISO 27018, CSA STAR L2 and PCI DSS
- Robust setup with full Disaster Recovery & Business Continuity in Riyadh
- Audited for compliance with SAMA, NCA, CST, CMA and SDAIA

SAHARA SHIELD

Managed security controls, fully run by us

Production-grade protection deployed, tuned, monitored, and maintained as a managed service - hosted in the Sahara Net cloud and integrated with our SOC.

Web Application Protection

Cloud WAF · continuous malware & hack scanning · managed deployment and tuning

Privilege Access Management

Secure remote access from anywhere · monitor, record & trace sessions · managed monitoring

Email Security

Advanced multi-layered email security · hosted in the Sahara Net cloud · managed tuning

Anti-DDoS Protection

Cloud-based DDoS protection · continuous monitoring & mitigation · managed deployment

Managed Firewall Service

Dedicated virtual/physical firewall · managed updates & configs · SIEM integration

EDR

Real-time automated endpoint protection · cloud-hosted · custom response playbooks

MANAGED SECURITY SERVICES

A SOC working for you, around the clock

Our analysts collect and correlate event logs against live threat intelligence, hunting for intrusion and acting on what they find - so your team can focus on the business.

Managed SOC & SIEM
24/7 log collection, correlation and alerting on your defined estate.

Threat Intelligence
Curated, contextual intel feeding detection and proactive defense.

MDR & EDR
Managed detection & response across endpoints with automated containment.

Advanced Threat Hunting
Proactive hunts for stealthy threats that evade automated tooling.

Managed Threat & Intrusion Detection
Continuous IDS and threat detection tuned to your environment.

Brand & Digital Risk Protection
Monitoring for impersonation, leaks and exposure beyond your perimeter.

Vulnerability Assessment
Ongoing identification, prioritization and tracking of weaknesses.

OFFENSIVE SECURITY

Find the gaps before attackers do

Red teaming and assessment services that test your defenses under realistic conditions - then turn findings into a prioritized plan of action.

Penetration Testing & VAPT

External, internal, web, mobile and source-code testing against your live environment.

Red Teaming

Goal-driven adversary simulation that exercises detection and response end to end.

Vulnerability Management

Continuous discovery, prioritization and remediation tracking across the estate.

Incident Response

Rapid containment, eradication and recovery — with forensic root-cause analysis.

Compromise Assessment

Hunt for existing, dormant or historical compromise across your systems.

Phishing & Gap Assessment

Simulated phishing and control-gap reviews to harden the human and technical layers.

GOVERNANCE, RISK & COMPLIANCE

Compliance, made defensible

We map your controls to the Kingdom's regulatory frameworks and produce the evidence to prove it - turning compliance from a burden into an asset.

FRAMEWORKS WE ALIGN YOU TO

- NCA ECC
- NCA CSCC
- SAMA CSF
- Aramco CCC
- PDPL
- ISO 27001
- MVC
- CST

Assessment & Gap Analysis

Measure current posture against target frameworks and quantify the remediation roadmap.

Documentation & Audit Support

Policies, procedures and audit-ready evidence mapped one-to-one to controls.

Awareness & Advisory

Security awareness, phishing programs and ongoing consultancy to sustain compliance.

SECURITY SOLUTIONS

A complete defense portfolio

Beyond managed services, we design and deploy the full stack of enterprise security technologies - organized across four domains.

Endpoint & Identity

EPP · EDR · PAM · IAM · MDM · MFA · Patch Management

Network & Data Center

NGFW · IPS · SSL VPN · NDR · Sandbox · Anti-DDoS · Deception · Vulnerability Mgmt

Security Operations & Intelligence

SIEM · SOAR · Threat Intelligence · TIP · Brand Protection

Application & Data

WAF · DNS · Web/Email/DB Security · Cloud Security · SASE · DLP · FIM · Watermarking

TECHNOLOGY PARTNERS

Best-in-class, vendor-neutral by design

As partners with the world's leading security vendors, we select and integrate the right technology for your environment - never locked to a single stack.

Fortinet	**Palo Alto Networks**	**Trend Micro**	**F5**
Wallix	**WithSecure**	**Microsoft**	**Cisco**
Kaspersky	**Barracuda**	**Acronis**	**KnowBe4**

Certified expertise across every platform. Our engineers hold vendor certifications across these ecosystems — so deployment, tuning and support stay in one accountable team.

CERTIFICATIONS & COMPLIANCE

Built on accredited trust

Our SOC and operations are independently certified and continuously audited against the Kingdom's leading regulatory and international standards.

- ISO 27001
- ISO 9001
- ISO 27017
- ISO 27018
- CSA STAR L2
- PCI DSS
- ISO 20000
- ISO 27701

LICENSED & AUDITED IN COMPLIANCE WITH

NCA · SAMA · CST · CMA · SDAIA

WHY SAHARA NET

One partner. Every layer of defense.

One accountable partner

Connectivity, cloud, data centers and security from a single carrier-neutral provider - one SLA, one team.

Operated inside the Kingdom

SOC in Dammam, DR in Riyadh, and data centers on Saudi soil - sovereignty and residency by design.

Always-on operations

24/7/365 monitoring and response by a certified, Saudi-national analyst team that never goes dark.

Regulator-grade compliance

Listed by the NCA, and audited against SAMA, CMA, CST and SDAIA requirements.

Defense in depth

Protection from the network edge to Layer 7 applications, identity and data - under one console.

Human-factor first

Awareness, phishing and red-team programs that close the gap attackers exploit most.
